44	Product Guarantee
----	-------------------

For close to 20 years, Bella Vista have manufactured and supplied beautiful, quality tapware to Australia's bath and kitchenware retailers.

Our focus is fixed on delivering innovative and finely-tuned designs that simply function better, standing the test of time.

From conception to delivery, each product is carefully considered to be the best it can be, ensuring a long life of service.

Look closely

We take immense pride in our work. Our superior engineering quality, brought to you by our in-house design team, means we can confidently stand by our range, knowing our standards are consistently high. We back it up with an extended guarantee period.

When you purchase a Bella Vista product, you'll display it proudly in your home for many years.

We invite you to take a closer look.

Obsessively engineered

At Bella Vista, we pride ourselves on a standard of design detail and manufacturing that is hard to match. Each product is crafted with rigour by our own engineers, right here in Melbourne, and is manufactured for lifetime use.

Because of this close attention to each stage of the design and production process, Bella Vista products boast superior quality and enjoy a longer life – we guarantee it.

The tiniest details are considered and refined – we carry out a stringent design process, where we continually ask ourselves – is this product as good as it can be?

We are committed to keeping production on-shore where possible, providing jobs within Australia. All of our design and warehousing as well as manufacturing of some key products is based in Melbourne, with the rest produced in carefully chosen facilities overseas – it's all part of our desire to deliver to the highest standard.

Sustainability front of mind

We're mindful of sustainability at every step of our production process. We care about the long term – the future of our planet. We take measures to reduce waste and contamination in the course of our production. We adapt a zero-wastage policy on the raw materials used to finish our products and we make sure to acquaint ourselves with the newest production technologies, in order to manufacture as sustainably as we can.

We're committed to ensuring our tapware helps to reduce water waste. All Water Efficiency Labelling and Standards (WELS) ratings can be found in accordance with the standards put in place by www.waterrating.gov.au

The personal touch

As a family-owned business, quality matters to us. It's a matter of personal pride.

After close to two decades in the bathware industry, we've forged a reputation and recognition through word of mouth – our loyal customers spread the word, and it has spurred our growth.

Thanks to our own quality control systems, we naturally hold ourselves to a higher standard. We work hand in hand with our manufacturing team and ensure regular face time with our suppliers, because continual adaptation is required to ensure maximum quality at every step of the manufacturing process.

One thing that never changes – we're only happy to stamp the Bella Vista name on products that are built to last.

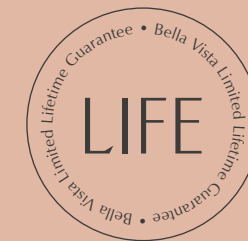

A traditional approach of honest communication whilst putting the customer first, has nurtured long lasting relationships within the industry. In turn, homeowners who are looking for the best products for their space, benefit from our connected and respected network.

Our customers speak highly of us – not just of our products – time and again they comment on the care that comes with their purchase.

Whether you're building your own home or carrying out renovations, you'll find what you need at hundreds of national and independent retail partners, each sharing our passion for bathware and good service. We make sure of it.

Backed by an extended Guarantee

Our after sales support is second to none and our products are backed by a lifetime guarantee. Turn to the back page for details.
